

Our association, exclusively composed of passionate volunteers, provides impaired, deprived, handicapped children (for whom every day life is pretty grim) some moments of dream, and something unique : a personalized first flight in a light aircraft. The children leave with many happy memories, and loaded down with presents.

RECOLLECTION 2012-2014

On several occasions FLY n'KISS brought together impaired (handicapped, with autism, diseased children) or deprived children, in 3 year time there were approximately 600 children invited to fly for the first time of their life. For the healthy children as well as for the « extraordinary » ones, these days were great opportunities to meet others and benefit from each other.

In parallel to these first flights FLY n'KISS organised workshops in connexion with aeronautics (radio controlled plane, building of plane model, painting, videos, snacks, boomerang, ...). It was a great success and from numerous parents we received messages of thanks, gratitude and congratulations.

2015 GOALS

The group cohesion has clearly demonstrated that we successfully organised great achievements. We have a broader ambition for 2015. By this, I mean, we plan to organise more first flights for these children, everywhere in France, bring them moments of happiness as much as we can. In order to ensure this, we have signed an agreement with le Cercle Aéronautique du Parlement & le Cercle Aérien d'HEC so as to share our energies, specially in common projects: <http://FLYnKISS.com/actualites.html>

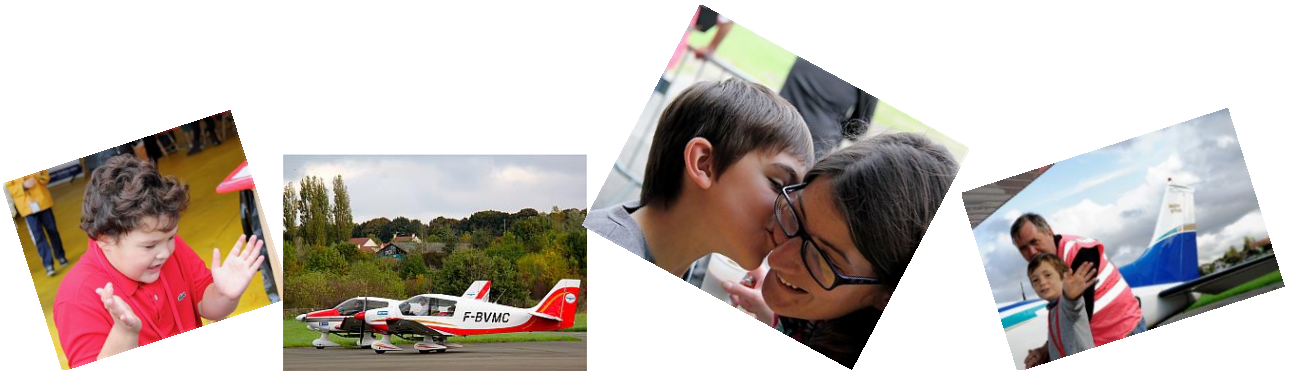

For a better media impact, we all share our communications. It's obvious that this is only achievable thanks to our sponsors/partners.

TAX RECEIPT

FLY n'KISS has just filled in a tax receipt procedure to become a public interest association and therefore to enable us to provide our generous donors with a tax receipt. We are awaiting their decision (expected by October 2014).

IN THE (AIR) FIELD

On Saturday, October the 26th, 2013, FLY n'KISS organised a first flight day for autistic children from the 'Sur les bancs de l'école' association. The tremendous voluntary mobilisation and the children happiness (and the accompanying parents' happiness) led us to realise that **we must go on !**

For 2015, our goal is to enable 300 children to enjoy their first flight. We are ready to do it as we are now fully organised and efficient in what we do. We are also well surrounded with many trustful people. Our plan for this winter is to raise funds to support our goal for 2015.

Some figures :

- A first flight costs us **65€** (including the flight (plane + fuel), the snack, plane models, various workshops, personalized diploma, pictures, goodies given to the children)
- 300 x 65 => 20 000 €
- We have sponsors who will carry on their help on 2015.

We are open to any sponsoring/partnership association who could help us carry on our activities and provide needful children with a moment of happiness.

Many thanks,

Thomas MACHADO
